- Slovenian - Native
- English

PROFILE

Hello! I'm David Aristovnik. I have been developing websites and applications, desktop and mobile apps and writing code for about 4 years, if I count more serious work. But I have been coding all together for about 7 years. I'm a student, and I just love what I do. I'm exited for what's to come in my career. Up until now I did some projects that came my way, from mobile apps to websites. I spent 2 months on Malta and about 10 months working at a banking company.

EXPERIENCE

2018
